About Me

Software developer with experience in modern web tools like React, Next.js, TypeScript, Prisma, Git, and PostgreSQL. I excellent in communication, organization, creativity, and quick adaptation. I'm eager to start as a Junior/Trainee Developer, applying my skills and growing within a dynamic team.

Education

Software engineering

2023 – now

National University of Ukraine “Igor Sikorsky Kyiv Polytechnic Institute”

Projects

AChat

Web application

Realtime chat built with Next.js that allows people to communicate with each other. This app has cool authentication system, integration with multiple services (AWS, Pusher, Resend).

SecureVault

Desktop application

Password manager for Windows built with Electron and React, for those who tired of “password123”.

Track Manager

Web Application

Web application built with React and Vite for managing and playing music tracks with a modern and intuitive interface.

Certificates

Networking Essentials

April 2024

By Cisco Networking Academy

Linux and Bash for Data Engineering

May 2024

By Duke university

Interacting with the System and Managing Memory

May 2024

By Duke university
